SUMMARY

3rd-year Computer Science student focused on software engineering, full-stack development, and AI/ML. Experienced in building REST APIs, data pipelines, and web UIs. Seeking internships or entry-level roles where I can apply OOP, SQL, and ML fundamentals.

EDUCATION

Central University of Jammu, Jammu, Jammu & Kashmir *Aug 2024 - May 2028*

Bachelor of Technology in Computer Science (3rd Year)

Acharyakulam, Haridwar, Uttarakhand *Completed May 2024*

Secondary Education, Grade: A+

TECHNICAL SKILLS

Programming: Python, C++, C, Java, SQL
Web & APIs: React, TypeScript, Node.js, Express, FastAPI, REST APIs
Databases: PostgreSQL, MySQL, SQLite, Sequelize
Data & ML: NumPy, Pandas, scikit-learn, Matplotlib, Seaborn, NLTK
Tools: Git, GitHub, Linux, VS Code, PyCharm, Jupyter Notebook
Core: Data Structures, OOP, Problem Solving, Software Design

EXPERIENCE

Edunet Foundation — Intern (Cybersecurity, Remote) *May 2026 - Jun 2026*

- Completed Cybersecurity program; learned network security, threat analysis and secure coding practices.
- Applied basic security checks to Python projects and documented remediation steps.

Edunet Foundation — Intern (AI & Python, Remote) *May 2025 - Jun 2025*

- Completed AI & Python internship; developed ML prototypes and preprocessing pipelines for text data.
- Implemented basic NLP workflows and model evaluation steps.

Central University of Jammu — Student *Aug 2024 - Present*

- Full-time CS student strengthening C++, problem solving, data structures, and OOP through coursework and projects.

PROJECTS

Lecture Notes Generator (React, TypeScript, FastAPI, Groq Whisper/Llama, SQLite)
GitHub: https://github.com/aditya-gautam912/lecture-notes-generator

- Built full-stack app to transcribe lecture audio and generate structured notes using speech-to-text and LLM summarization.
- Implemented FastAPI endpoints for uploads, audio chunking, and PDF export; added client-side progress and history features.

ShopEase Full Stack (React, Redux, Node.js, PostgreSQL, Sequelize)
GitHub: https://github.com/aditya-gautam912/Shopease-fullstack

- Implemented product catalog, cart flow, and JWT-based authentication (access/refresh).
- Designed database schema and REST APIs; prepared payment-ready integration architecture and tests.

Retail Analytics Dashboard (Python, Pandas, Streamlit)
GitHub: https://github.com/aditya-gautam912/data_analysis_dashboard

- Built ETL and visualization pipeline for retail datasets; created charts and simple forecasting to surface trends.
- Used SQL for data extraction and Pandas for feature engineering.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 100+ algorithm problems on LeetCode/HackerRank
- Completed Edunet Foundation AI certification (May–Jun 2025) and Cybersecurity course (May–Jun 2026)
